There is no longer a need to process NYC - PA DISC Notice Matching as described in the memorandum dated April 22, 1993, which is attached. Since the rate of achieving a match and preventing a case closing has been only marginally effective, we shall no longer expend staff time on this effort. Further, CNS Notice Matching should prove to be more effective in achieving our objective of communicating to the local agency the timely request for hearing which should then ensure the implementation of aid-continuing prior to case closing.
